

Vividion Therapeutics

Scientist / Senior Scientist, Proteomics

Vividion Therapeutics is seeking a highly motivated Scientist to contribute to the identification and development of novel small-molecule drugs. Vividion is a privately held biotechnology company based in San Diego that is leveraging an innovative and proprietary chemical proteomics platform to efficiently discover novel drugs in multiple areas including oncology and immunology.

As an early stage startup company, Vividion is looking for energetic candidates with a desire to work in a fast-paced and dynamic team environment. Extensive hands-on experience and expertise with mass-spectrometry instrumentation and MS-based proteomics applications are required, including quantitative strategies like isotopic and isobaric labeling, as well as label-free techniques (e.g. DIA, PRM/SRM). Strong working knowledge of biochemistry and analytical chemistry are desired; familiarity with small-molecule pharmacology is a plus. The successful candidate will join a small group of Proteomics scientists working to develop and operate a cutting-edge chemoproteomic screening platform for the discovery and development of novel drug candidates and targets.

Experience and education Requirements:

- PhD (or equivalent experience) in mass-spectrometry based proteomics, analytical chemistry, chemical biology, or related discipline with 2-4+ years of relevant post-graduate experience
- Extensive hands-on experience with Thermo Orbitrap mass spectrometers and associated software
- Demonstrated ability to apply and troubleshoot complex proteomic techniques in a biological context
- Experience with ancillary techniques is highly desirable (cell culture, molecular biology, immunoprecipitation/protein isolation, PTM enrichment, bioinformatics, etc)
- Excellent oral and written skills
- Be an effective team player and strong individual contributor, flexible, and able to handle multiple tasks and deliver high quality results under tight timelines
